

CITY OF SAN ANTONIO
TRANSPORTATION & CAPITAL IMPROVEMENTS

July 1, 2014

To Whom It May Concern:

It is my pleasure to provide this letter of reference to Bain Medina Bain for the work they performed on Villaret Road (Highway 16 to Jennifer). Bain Medina Bain helped to realize the vision of Alamo Colleges and the City by improving drainage, widening Villaret to four lanes with a turning lane, and installing bike lanes and sidewalks.

Bain Medina Bain collaborated with all parties involved to provide design solutions that would offer long-term solutions and accommodate the growth of the Southside. Bain Medina Bain kept to budget and to schedule and remained involved and available until project completion.

Bain Medina Bain has worked with the City for many years providing civil engineering and surveying services through Indefinite Deliver Indefinite Quantity (IDIQ) contracts and through the City's bond programs. Their proficiency, professionalism and responsiveness keep them in the top tier of our preferred consultants. We look forward to many more years working together.

Sincerely,

Mike Frisbie, P.E.
Director/City Engineer
